

# Dispelling the myths of CE Marking: Structural Steelwork

## The 6 piece Jigsaw

1. FPC/WQMS is the Factory Production Control (Welding Quality Management System)
2. WPQR/WQT are the Weld Procedures and Welder Qualification Tests
3. Welding Co-ordinator
4. (RWC) Responsible Welding Co-ordinator
5. External Audit
6. CE Accreditation Achieved

CE marking is a key indicator of a product's compliance with EU legislation and enables the free movement of products within the European market. BS EN 1090-1:2009 is the latest EU regulations that cover the creation and sales of structural steelwork which was put into regulation in July 2014. Many companies are still finding the process and its implementation puzzling and have struggled to establish a starting point in their journey to CE compliance.

BNDT are here to help dispel the myths of CE and offer guidance on how to assemble the pieces together. We have helped over 200 companies nationally to solve the CE jigsaw puzzle.

Whether you are just beginning or are already part way through the process we are here to **help**.

Visit us at [www.bndt.co.uk](http://www.bndt.co.uk) or please call us on **0161 794 0342** to get your CE problem resolved.
